

GRIMALDI LUCIA SOLANO TIJERINO

Software Development Intern | Frontend | Junior Full Stack | Web and Mobile

Guápiles, Limón, Costa Rica | 6451-0586 | solanogrimaldi09@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL PROFILE

Final-year Business Informatics student (University of Costa Rica) with experience in frontend and full stack development through academic and collaborative projects. Passionate about building intuitive, reliable, and well-documented web and mobile interfaces. Recognized for adaptability, teamwork, and the ability to quickly learn new technologies. Strong working knowledge of React, Vue.js, Angular, .NET, FastAPI, and relational databases. Proven ability to integrate REST APIs, develop CRUD modules, and analyze technical requirements.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, Java, C#

Frontend: React, React Native, Vue.js, Angular, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend and APIs: .NET, FastAPI, Spring Boot, Laravel, Node.js

APIs and Architecture: REST, MVC, Hexagonal, Modular

Databases: MySQL, SQL Server, PostgreSQL

Tools: Git, GitHub, Docker, Postman, Expo, VS Code, npm

Methodologies: Scrum, Incremental Development, UI/UX Design, Technical Documentation

ACADEMIC & COLLABORATIVE EXPERIENCE

Software Developer in Academic and Collaborative Projects | Frontend, Backend, Databases, and Version Control

- Developed scalable web and mobile frontend interfaces, applying best practices and modular/hexagonal architecture.
- Integrated backend services, authentication, state management, validations, and data consumption.
- Built CRUD modules for inventory, users, reports, and operational management.
- Participated in Scrum-based development and sprint deliveries, using version control tools such as Git and GitHub.

FEATURED PROJECTS

Zybus - Intelligent Transportation System | Vue.js, TypeScript, FastAPI, MySQL, Docker

- Frontend web developer built multiple administrative views, interface designs, complex forms, validations, and user flows.
- Designed and developed reusable components, managed global state through stores, handled data models, created services for REST API consumption, and defined utilities for shared logic.
- Structured modules following best practices, improving maintainability, scalability, and collaboration among developers.
- Implemented dynamic views, user flows, validations, mock data, and module-specific routes.
- Collaborated with a team of 25+ people under Scrum, coordinating deliveries and code reviews through GitHub. [Frontend WebGit](#)

Zybus - Intelligent Transportation System | React Native, Expo, TypeScript, FastAPI, MySQL

- Developed the mobile application for Zybus users and administrators, including mobile views, authentication flows, forms, and mobile-friendly validations.
- Used custom and React hooks to efficiently manage state, logic, navigation, and application lifecycle, improving code reusability and clarity.
- Integrated backend services through REST APIs, handled validations and forms, optimized user experience (UX), and tested on physical devices.
- Focused on mobile usability (UX), physical device testing, and cross-platform optimization.
- Participated in requirements definition and user experience decisions with a multidisciplinary team. [AppMovilGit](#)

SuperLaCentral - Supermarket Administrative System | Angular, TypeScript, .NET, SQL Server, HTML, CSS

Frontend Web

Technologies: Angular, TypeScript, HTML5, CSS3, SQL Server

- Developed CRUD modules for inventory, products, categories, suppliers, promotions, orders, and order details.
- Implemented reusable components, dynamic forms, and administrative views for internal operations management.
- Integrated frontend views with backend services and database connectivity. [FrontendWebGit](#)

Backend

Technologies: .NET, C#, SQL Server, REST API

- Participated in the development and maintenance of the backend using .NET architecture and RESTful web services.
- Implemented endpoints for CRUD operations, authentication, role management, and security.
- Modeled and optimized the database, created stored procedures, and implemented validations.

- Integrated the backend with the frontend to support communication between views, services, and data management.

EDUCATION

University of Costa Rica - Bachelor's Degree in Business Informatics | March 2022 - March 2027

Coursework in programming, databases, web development, software engineering, networking, project management, and enterprise systems.
